

Antique Cross Country Skis, Scandinavian 19th.C.

Sold

REF: 26110

Height: 240 cm (94.5")

Description

Pair of early Scandinavian Skis, most probably made for cross country purpose. The ski's have the unusual wide groove on the bottom and a early type binding that is fitted through the ski. The front par of the binding may well be a later addition. These ski's are 240 cm long which is quite a bit longer than the usual length. A rare pair in fairly original condition.
