

Unusual Small Bramble Gibson Golf Ball

William Gibson

Sold

REF: 28692

Diameter: 3.6 cm (1.4")

Description

Gibson STAR Bramble Golf Ball.

A very rare and unusually small moulded bramble pattern golf ball. The ball is marked with a 'STAR' on both poles and is with the classic bramble pattern, raised dimples. The 'STAR' is the classic cleek mark for the renowned clubmaker William Gibson. The ball has been constructed in a ball mould as you can clearly see the equator line. This could quite possibly be a child's golf ball because of its size.

The ball is approximately 1 7/16 inch in diameter (3.6 cm).
