Description

Rare Lawn Tennis Court Tape Measure.

This useful tool is made of brass with a 78' canvas tape. The front is printed with the measurements of a singles and doubles lawn tennis court with the net height and post positions. Anyone with a lawn large enough could purchase a complete boxed set with the necessary equipment and set up a lawn tennis court. The tennis tape measure was a vital piece of equipment to do this accurately. The measure with trade mark - two arrows within a shield, which is possibly the mark of A.W. Gamage, Holborn.
